Rejections under 35 USC §102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4, 8 and 15-19 are rejected under 35 U.S.C. 102(e) as being anticipated by McCreery.

Rejections under 35 USC §103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2, 14, 20, 23, 25, 27 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over McCreery.

Allowable Matter

Claim 7 is objected to while containing allowable matter.

The following is a statement of reasons for the indication of allowable subject matter: McCreery does not disclose: *normalizing data before the data is placed in the stream* in combination with all the remaining limitations of the claims.

Claim 30 is objected to while containing allowable matter. McCreery does not disclose the *changing of the filtering* of the data based on an event, based on the analysis of the data.

Applicant is reminded that claims are indicated as containing allowable matter with respect to the claim a whole and any change to the scope of the claim may jeopardize this indication of allowable matter.
